DETAILED ACTION

Page 2

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-14, drawn to a method of using a biological membrane microarray for target evaluation, classified in class 435, subclass 7.72, for example.
 - II. Claim 15, drawn to a method for determining tissue distribution of a particular drug target, classified in class 435, subclass 7.2, for example.
 - III. Claim 16, drawn to a method for determining abnormal expression level of a particular drug target in a disease tissue or an abnormal cell, classified in class 436, subclass 519, for example.
 - IV. Claim 17, drawn to a method for determining protein-protein interaction, classified in class 436, subclass 528, for example.
 - V. Claim 18, drawn to a method for determining or profiling the relative level of membrane-interacting protein expression within a cell, classified in class 436, subclass 518, for example.
 - VI. Claim 19, drawn to a method for determining lipid receptor-protein interaction, classified in class 435, subclass 7.1, for example.
 - VII. Claim 20, drawn to a method for determining or profiling the level of membrane-interacting protein expression within a cell, classified in class 422, subclass 523, for example.
